Activity

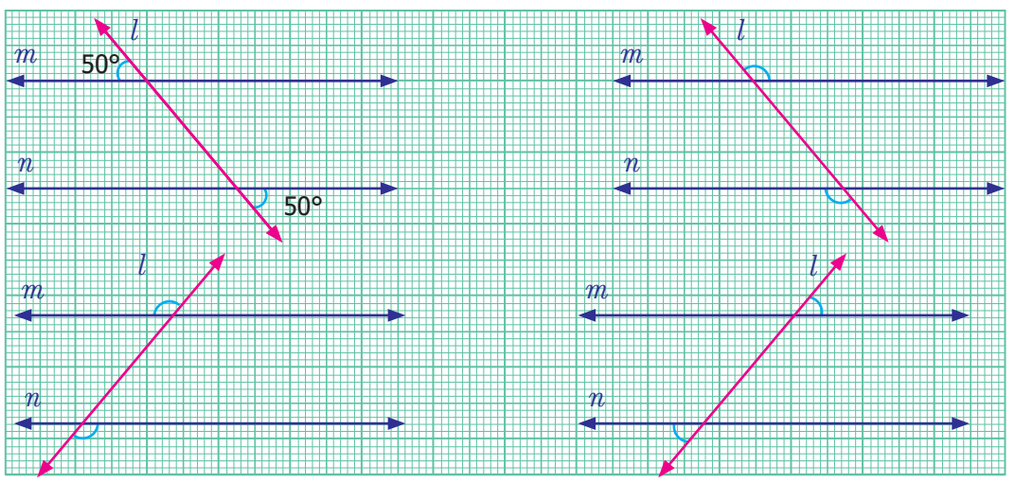

Observe the alternate Interior angles in each figure. Both lying between the interior of the parallel lines and on the opposite sides of the transversal. One pair of angles are measured and found equal. Measure the remaining three pairs of angles and check.

From the above activity we can conclude that when two parallel lines are cut by a transversal, each pair of alternate interior angles are equal.

Activity

Observe the marked alternate Exterior angles in each figure. Both lying at the exterior of the parallel lines and on the opposite sides of the transversal. One pair of angles are measured and found equal. Measure the remaining three pairs of angles and check.

From the above activity we can conclude that when two parallel lines are cut by a transversal, each pair of alternate exterior angles are equal.
