

1.0 **0.1** **0.01**

Having these square and rectangular area let us try to do addition and subtraction of decimal numbers.

Example 1.8 Add 3.2 + 6.4.

Solution

3.2 6.4 9.6

Here 3.2 is represented in Blue colour and 6.4 is represented in Green colour. Hence, the sum of 3.2 and 6.4 is 9.6.

Example 1.9 Subtract 7.5 – 3.4 .

Solution

First represent the decimal number 7.5 using 7 squares and 5 rectangular strips. Cross out 3 squares from 7 squares and 4 rectangular strips from 5 rectangular strips to get the difference (see *Fig. 1.5*).

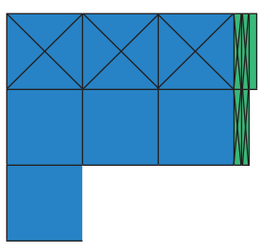

Fig. 1.5

Hence, 7.5 – 3.4 = 4.1

Try this

Using the area models solve the following:

(i) 1.2 + 3.5

(ii) 3.5 – 2.3
