$$= \frac{25}{325} \times 100 = \frac{100}{13} = 7\frac{9}{13}\%.$$

Example 2.22 A T-shirt bought for ₹110 is sold at ₹90. Find the loss percentage.

Solution

Cost price of T-shirt is ₹110 and Selling price is ₹90. So, the loss is ₹20

Hence, for ₹100 the loss is $\frac{20}{110} \times 100 = \frac{200}{11} = 18\frac{2}{11}\%$.

Example 2.23 An item was sold at ₹200 at a loss of 4 %. What is its cost price.

Solution

To find the cost price,

$$\text{Loss per cent} = \frac{\text{Loss}}{\text{C.P}} \times 100$$

$$4\% = \frac{\text{Loss}}{\text{C.P}} \times 100$$

$$4\% = \frac{\text{Loss}}{200} \times 100$$

$$\text{Loss} = 8$$

$$\text{C.P} = \text{S.P} + \text{Loss}$$

$$= 200 + 8$$

$$= 208$$

Hence the cost price of the item is ₹208.

The world's population is growing by 1.10 % per year.

50.4 % of the world's population is male and 49.6 % is female.

DO YOU KNOW?

Exercise 2.3

1. 14 out of the 70 magazines at the bookstore are comedy magazines. What percentage of the magazines at the bookstore are comedy magazines?
2. A tank can hold 50 litres of water. At present, it is only 30 % full. How many litres of water will fill the tank, so that it is 50 % full?
3. Karun bought a pair of shoes at a sale of 25%. If the amount he paid was ₹1000, then find the marked price.
4. An agent of an insurance company gets a commission of 5% on the basic premium he collects. What will be the commission earned by him if he collects ₹4800?
5. A biology class examined some flowers in a local Grass land. Out of the 40 flowers they saw, 30 were perennials. What percentage of the flowers were perennials?
