The world comes to brightness

Thomas Alva Edison (1847-1931)

Thomas Alva Edison was affected by scarlet fever and hence he joined the school at Fort Huron in America only at the age of eight.

After leaving the school, his mother who was a teacher taught lessons at home for three years.

Since the age of seven, Edison was interested towards domestic electrical devices. At the age of 9, he read the book, “Natural and Experimental Philosophy” written by Richard Parker. At the age of 21, he read deeply Michal Faraday’s “Experimental Researches in Electricity”.
