- ❖ Changes that occur with the formation of new substance with different chemical composition or transformation of a substance into another substance with the evolution or absorption of heat or light energy are termed as chemical changes.
- ❖ Changes that repeat themselves after a definite interval of time are called periodic changes.
- ❖ Changes that do not repeat themselves after a definite interval of time and occur randomly are called non-periodic changes.
- ❖ Changes in which heat is absorbed are known as endothermic changes.
- ❖ Changes in which heat is released are known as exothermic changes.

Evaluation

I. Choose the best answer

1. When a woolen yarn is knitted to get a sweater, the change can be classified as _____ .
   a. physical change b. chemical change
   c.endothermic change
   d. exothermic change
2. _____ of the following are endothermic changes.
   a. Condensation and melting
   b. Condensation and freezing
   c. Evaporation and melting
   d. Evaporation and freezing
3. The chemical change is _____ .
   a. water to clouds
   b. growth of a tree
   c. cow dung to bio-gas.
   d. ice-cream to molten ice-cream.
4. _____is an example of a periodic change.
   a. Earthquake.
   b. Formation of rainbow in sky
   c. Occurrence of tides in seas.
   d. Showering of rain
5. _____ is not a chemical change.
   a. Dissolution of ammonia in water
   b. Dissolution of carbon-di-oxide in water
   c. Dissolution of oxygen in water
   d. Melting of polar ice caps

II. Fill in the blanks

1. Filling up a balloon with hot air is a _____ change.
2. Stretching gold coin into a ring is a _____ change.
3. Opening a gas cylinder knob converts _____ fuel into _____ fuel. This is an example of _____ change.
4. Spoiling of food is a _____ change.
5. Respiration is a _____ change.

III. True or False. If false, give the correct answer.

1. Cutting of cloth is an example of a periodic change.
2. Taking a glass of water and freezing it by placing it in the freezer is a chemical change.
3. A bean plant collecting sunlight and turning it into bean seeds is an example of physical and non-periodic change.
4. If the chemical properties of a substance remain unchanged and the appearance or shape of a substance changes it is called a periodic change.
5. Tarnishing of silver is an example of endothermic change.
