

Frog (Amphibian)

Crocodile (Reptiles)

Cow (Mammals)

Bird (Aves)

## IMPORTANT CHARACTERISTICS OF FIVE KINGDOMS

| Characteristics | Monera | Protista | Fungi | Plantae | Animalia |
|---|---|---|---|---|---|
| 1. Cell Type | Unicellular, Prokaryotic. | Unicellular, Eukaryotic. | Multicellular, Non – green and Eukaryotic. | Multicellular, Eukaryotic. | Multicellular, Eukaryotic. |
| 2. Nucleus | Absent. | Present. | Present. | Present. | Present. |
| 3. Body Organisation | Cellular level of organization | Cellular level of organization is | Multi cellular with loose tissue. | Tissue level and organ level. | Tissue, organ and organ system. |
| 4. Mode of Nutrition | Auto (or) Heterotrophic. | Auto (or) Heterotrophic. | Saprophytic, parasitic sometime symbiotic | Autotrophic. | Heterotrophic. |
| 5. Example | Bacteria and Blue green algae. | Spirogyra and Chlamydomonas. | Rhizopus and Agaricus. | Herb, Shrub and Trees. | Fish, frog, crocodile, Birds and human being |

### Merits of five Kingdom Classification

- ❖ This system of classification is more scientific and natural.
- ❖ This system of classification clearly indicates the cellular organization, mode of nutrition, and characters for early evolution of life.
- ❖ It is the most accepted system of modern classification as the different groups of organisms are placed phylogenetically.
- ❖ It indicates gradual evolution of complex organisms from simpler one.

### Demerits of five Kingdom Classifications

- ❖ In this system of classification of viruses have not been given a proper place.
- ❖ Multicellular organisms have originated several times from protists.
