❖ This type of classification has drawn back with reference to the lower forms of life.

❖ Some organisms included under protista are not eukaryotic.

5.4. Binomial Nomenclature

Gaspard Bauhin in 1623, introduced naming of organisms with two names which is known as Binomial nomenclature, and it was implemented by **Carolus Linnaeas** in 1753. He is known as **'Father of Modern Taxonomy'.**

Binomial nomenclature is an universal system of naming organisms. As per this system, each organism has two names – the first is the **Genus** name and the second is the **Species** name. Genus name begins with a capital letter and Species name begins with a small letter.

Example: The nomenclature for onion is ***Allium sativam***. Genus name is ***Allium***, species name is ***sativam.***

Vernacular name is a local name that is familiar for a particular place. Binomial name is an universal name which never changes. Binomial nomenclature and classification helps scientists to identify any organisms and to place them at a particular hierarchy.

ACTIVITY 4

Field trip to sanctuaries / zoo should be arranged. Students are guided to observe the animals and explain about the feature of animals how they are protected and maintained in the zoo. Note the displayed names of the plants and animals. Discuss your observation in the class

DO YOU KNOW?

Scientific Names of Some Organisms

S.No	Common Name	Scientific Name
1.	Human being	*Homo sapiens*
2.	Onion	*Allium sativum*
3.	Rat	*Rattus rattus*
4.	Pigeon	*Columba livia*
5.	Tamarind	*Tamirindus indica*
6.	Lime	*Citrus aurantifolia*
7.	Neem Tree	*Azadirachta indica*
8.	Frog	*Rana hexadactyla*
9.	Coconut	*Cocos nucifera*
10.	Paddy	*Oryza sativa*
11.	Fish	*Catla catla*
12.	Orange	*Citrus sinensis*
13.	Ginger	*Zingiber officinale*
14.	Papaya	*Carica papaya*
15.	Date	*Phoenix dactylifera*

POINTS TO REMEMBER

❖ Classification of living organisms is made on the basis of their characteristics, similarities and differences.

❖ Classification is needful to identify living organisms and to study about them conveniently

❖ Kingdom is the largest division of the living world and species is the basic unit of classification.

❖ Kingdom Animalia is divided into 2 sub kingdoms.

- Invertebrates (Animals without back bone)
- Vertebrates (Animals with back bone)

❖ Invertebrates are classified into nine phyla

❖ Vertebrates are classified into five classes
