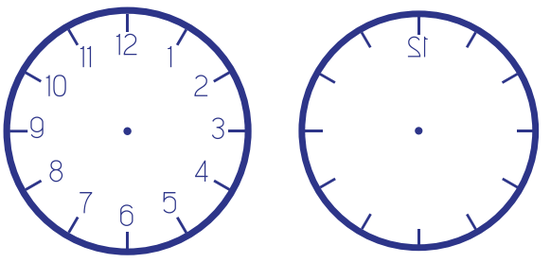
4. What is the angle of reflection corresponding to the ray CD?

18. Rajan was playing with the mirror images of a clock. He looked at the clock in his room. It was showing 1:40. Draw the position of the hands on the real clock and on its mirror reflection. Write below the picture what time each picture is showing.



19. What is reflection of light?

20. If a ray of light is falling on a plane mirror at an angle of 50° is formed, what will be the angle of reflection?

21. What do you mean by lateral inversion?

22. How do you obtain a spectrum of light?

23. Why do we see white colour in Newton's disc, when we rotate it very fast?

24. What is a shadow? What things are necessary for the formation of a shadow?

VI. Answer the following questions in detail

1. What are regular and irregular reflection? Explain with the help of diagrams.

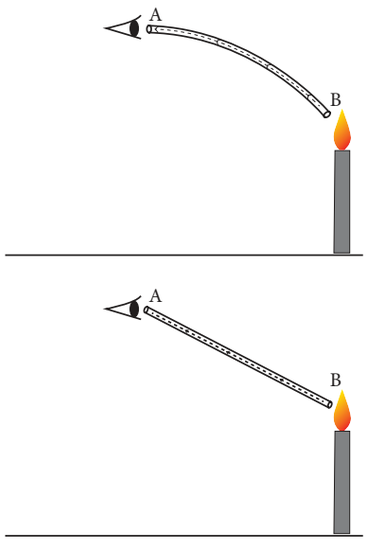
2. What are the difference between luminous and non-luminous objects? Give two examples of each.

3. Write about two everyday situations that tell you that light travels in a straight line.

4. Differentiate between a reflection and a shadow.

5. What are the characteristics of an image formed in a plane mirror?

6. Describe the pictures.



7. Define the following terms
   a. Incident ray
   b. Reflected ray
   c. Normal
   d. Angle of incidence

8. Compare the images formed by plane mirror with that by pinhole camera.
