Eggs

Eggs are laid by female birds of many different species to produce their young ones like hen, duck, turkey and ostrich. We use these in our daily life for the following.

- They are used in our daily diet to get energy and good health.
- It is highly nutritious and rich in protein.
- Eggs have 6 grams of high-quality protein. A protein packed breakfast helps to sustain mental and physical energy throughout the day. Consuming egg daily is good for any age people.

ACTIVITY 2

Can you distinguish a fresh egg from a rotten one?

1. Take a bowl of water.
2. Put the egg in the bowl.
3. Observe now, the fresh egg will sink. But the rotten egg will float.

Honey

Where from honey comes? How it is produced? Have you seen a beehive where many bees are seen buzzing about? Bees collect nectar (sweet juices) from flowers, convert it into honey and store in their honey comb.

- Honey is a sweet liquid produced by honey bees from the nectar of flowers. It is extracted from beehives by us.
- Raw organic wild honey is extracted from selected hives by tribal honey hunters, who collect it from jungles.
- Honey has more medicinal values and highly nutritious food.
