

Cotton Industry

Engineering & Building

Manufacturing of cars, clothing, chemicals, engineering and building etc., are examples of secondary sector.

3. Tertiary Production

Tertiary production is known as the services that are not visible rendered by the teachers, doctors etc., are to the economy. Banking, insurance, education, health and defence etc., are examples of the service sector.

Defence

Banking

Education

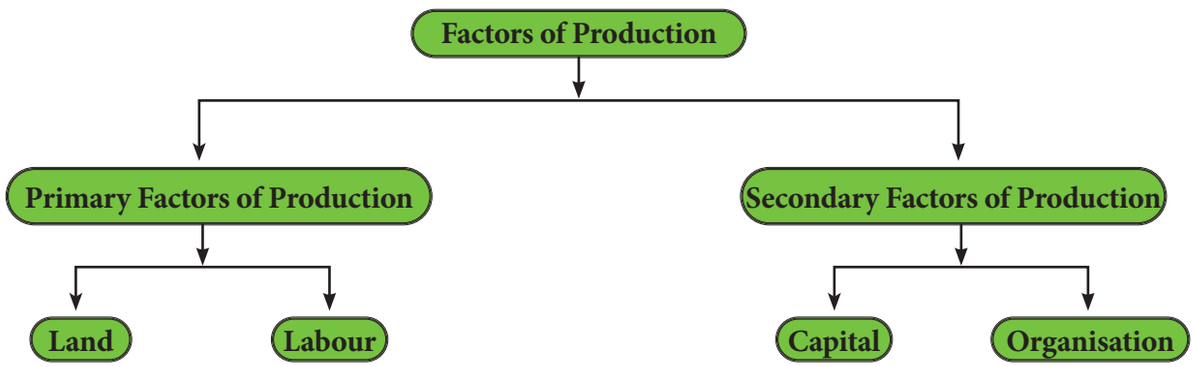

The most to the Gross Domestic Product of our country is contributed by the tertiary sector.

Factors of Production

Factors of production are known as inputs of production which are transformed into output or products. There are two main divisions of factors of production. They are (i) Primary factors of production and (ii) Derived factors of production or modern factors of production or secondary factors of production.

Primary factors of production are land and labour. Derived factors of production are capital and organisation.

Capital is known as investment and the Organisation is known as organising land, labour and capital for producing products. Organisation is also known as Entrepreneurship.
