

Natural Regions of North America

Agriculture

Though least proportion of the total workforce is engaged in agriculture. America's agriculture is most productive in the world. Extensive agriculture system is practiced in Canada and USA. Both Canada and USA are the major exporter of wheat than the other countries of the world. Wheat, Corn (Maize), Oats, Soybean, Barley and many other food crops are grow well in the vast interior plains.

Wheat

Wheat was introduced by European settlers in North America. It is grown extensively in the Prairies of North America. North America is the largest exporter of wheat. Vast wheat producing areas are called wheat belt.

Maize

It is the native food crop of North America which is the main staple food grains in Mexico. It is grown in southern Prairies. North America produces more than half of the world total Maize.

Barley and Oats

These are temperate crops which withstand cold climate and less water. Barley is grown in the United States and are produced in Minnesota, North Dakota and Washington. Barley and Oats are used as cattle fodder.

Cotton

Cotton grows well in Southern and Western States and it is dominated in Texas, California, Mississippi, South of the Prairies and the Mexico. Warm summer with frequent rainfall and fertile soil are favourable conditions for growth of cotton crop.

Agriculture of North America

Sugar cane

Sugar cane is cultivated along the Gulf of Mexico, Parts of Central America and West Indies. It is an important Cash Crop of West Indies. Cuba
