

Physiographic of South America

The Andes Mountains

The Andes are fold mountains like the Himalayas. This is the longest mountain range in the world and extends for more than 6,440 km along the Pacific Coast. The highest peak in the Andes is Mount Aconcagua (an extinct volcano) in Argentina border which reaches at an elevation of 6,961m. In Chile, the mountains run very close to the coast. The slopes are steep on the western side and gentle on the eastern side like Rockies in North America. The Andes
